Bill Strickland: As the outgoing president, I would like to review what our club has accomplished in the past year. When focusing on current and near future activities and goals, it's easy to forget the long-term picture. Keep in mind that these tasks are in addition to the traditional annual events! As you can see, many members accomplished a great many tasks:

Purchased a new trailer and sold the old trailer (Richard Arnold)

- Rebuilt the second story floor in our clubhouse (Randy, Jack, Jackie)
- Created a membership survey to determine what members like and want (Bill)
- We matched and renumbered our show cases (many people)
- Moved the board meeting to the week before the General Meeting (Board)
- We made our projected/budgeted profit for our annual show (thanks Melody!)
- Fully documented all of the teams and tasks needed for our annual show (again thanks to Melody)
- We changed banks where our club funds are maintained (Nancy)
- Fixed several typos and printed new blue Thunder Egg pamphlets (Alice)
- Improved our club website (more content is needed!) but improvements made- (Brian Davis)
- Installed a landline for the shop (for the fastest possible response should an injury occur)
- Purchased a sled for use at our rhodonite claim (to move equipment & rocks)
- Obtained an attorney approved Liability Form (Dan Simcoe)
- Memorial case for Clyde Wilson displayed at annual show (George Phillips)
- Randy replaced Clyde in organizing school visits
- Bill Boeh replaced Clyde to teach Faceting class
- Obtained a new PA system for meetings (Linda Pullen)

This list shows that it takes MANY generous and talented individuals to respond to our club's needs and enable necessary changes to make our club safer, organized, attractive to others, and just plain fun!

Connie Silver: PUT IT ON YOUR CALENDAR October 6th, 9 till 2. Our 2nd annual club Fun Day and tailgate sale. We will have both indoor and outdoor sales as we did last year. Potluck lunch. Harold and I will furnish the sandwich fixings and drinks. We will advertise this as a parking lot sale so it is not related to rock items only. Will have sign up sheets at the September meeting. More information will follow at the meetings and in the newsletter. Harold & Connie Silver 541-770-9459

Dale Wheeler: I accepted a position back in the club, appointed by Gary, to be the program arranger, so the September program, yes we are going to have 20 minute programs, and the title is COLOR IN MINERALS.

Club Member Announcements (contd.)

Alice Gutshall: I hope everyone had an opportunity to go out and enjoy the fair this year. I wouldn't miss it for the world, or even for moving.. I will be back to my editor duties in September. Whew!!! Last time I moved, 6 years ago, I said never ever again!!!! As I was once told, never say never... Moving is sure not for old people. This month, I encourage you to take some time to go visit Bill and Rita at their Sunstone mine. It is beautiful out there. Lots of good fun with lots of great fellow club members. Who knows, you may just find a large red gemmy stone. I will try to make every effort to be there this year. There is dry camping at the site and also in the surrounding area. A nice place to consider camping is the top of Hart Mt. It is so different up there. You will see the elusive Antelope in their native habitat and while on the mountain, take in the Hot Spring. It has a nice stone wall around it for privacy and wind control. There are also petroglyphs to be found up there. Let's not forget the Hart Mountain Jasper either. I understand it can be difficult to locate. Another fun side trip is to De Garmo Canyon. Look Very carefully for the weathered sign as you travel the road to the Hart Mountain turn off. There is a nice dry campground just at the base of the mountain too. And, don't forget the public sunstone area for dry camping as well. I hope everyone enjoys this trip and I will see you in September.

Judy Anderson, Substitute Editor: Hello everyone. As Alice is in the process of moving, I've put together September's newsletter, as best as possible with the information provided me. Any questions or comments, please call or email me at 541-226-6997, judyatgprock@yahoo.com. Alice will be back at it for October's newsletter so please send all information to her from here on out. See you at the meeting.

Shop Talk: Mike Hepburn:

This is the last instructions on the Genie and Pixie wheels, next month something new, maybe. It is important to do as good a job of sanding at each stage before going to the next wheel as the finer grit wheels take much longer to remove deep scratches than do the coarser wheels. Strive for a perfectly uniform finish over the entire surface of your stone. This is the best way to judge when you are through with one step and are ready for the next.

Have Something for sale? You may have noticed ads appearing in the Newsletter. You can advertise here too 3 lines for \$3.00. Contact Alice to place your ad 503.816.3152

New Geological Age Named: Welcome to the Meghalayan!

Scientists have been debating a new name for our current geological epoch, namely the "Anthropocene," to reflect human influence on our planet since 1950. While that name continues to be debated, one new name was officially announced in July by the [International Commission on Stratigraphy](#): the Meghalayan age. To earn a name, a proposed geological age must have a marker in the rock record. This one's marker comes from oxygen isotopes in a stalagmite from India.

*The Holocene Epoch is now officially divided into three ages: **Greenlandian** (starting 11,700 years ago as massive continental glaciers retreated), **Northgrippian** (starting 8,300 years ago at the start of a renewed cooling trend), and **Meghalayan** (starting 4,200 years ago with a drought that saw the decline of several ancient civilizations).*
